# **CROSS DRIVE™ DESIGN**

The Cross Drive™ is an internally geared belt conveyor head pulley. It has the same gear reducer with the same 96% mechanical efficiency as the drum motor.

The Cross Drive<sup>™</sup> has all vital components such as gears, bearings and seals permanently lubricated within the drive shell. The electric motor is mounted externally on the faceplate of the Cross Drive<sup>™</sup>, which has been designed to **accept any standard C flange mount electric motor** or the exclusive **Pancake design motor** that reduces the overall motor length by up to 50%. Installation and removal of the electric motor is quick and easy, requiring only four bolts.

## **INCREASE** Production

## **REDUCE** Derating Costs

## **SAVE >** Energy & Maintenance Costs

# **CROSS DRIVE™ DESIGN**

#### **INCREASES OPERATIONAL SAFETY**

- ► Exceeds OSHA safety requirements
- ► No exposed rotating shaft
- ► No external moving parts

## HIGH EFFICIENCY AC PANCAKE MOTOR (SHORT-EGRESS)

- ► Reduces motor protrusion —
- ► Aproximately half the length of a standard electric motor
- ▶ Designed for use with variable frequency drives

## REDUCES DOWNTIME / INCREASES SYSTEM AVAILABILITY & MAINTAINABILITY

- ► Electric motor is quickly and easily released from system (4 bolts)
- ► Easy connect Lovejoy coupling between pulley and motor
- ▶ Works with standard NEMA C-face motors OR with the Van der Graaf PANCAKE motor

## **REDUCES MAINTENANCE**

- ► No grease ports
- ▶ Internal oil-bath lubricates bearings and gears

### **EASILY RETRO-FITTABLE**

- ► Flange and block mount brackets available with standard bolt pattern
- ► Works with standard NEMA C-face motors

### NO EXTRA MOTOR / GEARBOX SUPPORT-STRUCTURE NEEDED

### 96% MECHANICAL EFFICIENCY
